FIXED SIGHTS FOR SEMI-AUTO PISTOLS

Aristocrat semi-auto sights are designed to provide a durable fixed sight replacement that offers the crisp sight picture and fast sighting qualities of competition target sights.

These advantages are accomplished by providing a more conventional shaped rear sight blade which is angled back to reduce glare and also extends to the rear of the slide to provide a longer sight radius. All models are low profile. Some models are designed to use the original factory front sight. They have a smooth contoured shape and are made of a high quality heat treated steel.

All of these features make these rear sights desirable for a wide range of uses. It also makes installation easy and inexpensive. Ask your dealer or gunsmith.

CUSTOM REAR SIGHTS FOR BERETTA 92, 96 AND COUGAR MODELS

Our Beretta rear sights are designed to work with the original factory front sight. There are two models available, plain and two dot.

CUSTOM REAR SIGHTS FOR 1911 STYLE AUTOS

These rear sights deliver an exceptionally clear sight picture. The curved body blends well with the top of the slide. They work well with some original factory front sights. We offer a variety of front sights designed to meet every requirement. There are two models available, plain and two dot.
